How to access the Razer Leviathan Service USB port

Use this guide to access the service port for firmware updating purpose.

This guide instructs you to remove the plastic covering the Service USB port using a flat head tool.

Step One: Locate the Service USB port.

Step Two: Use your flat head tool and gently remove the plastic covering.

Once you have done with the firmware update, kindly seal the Service USB port with the plastic covering.
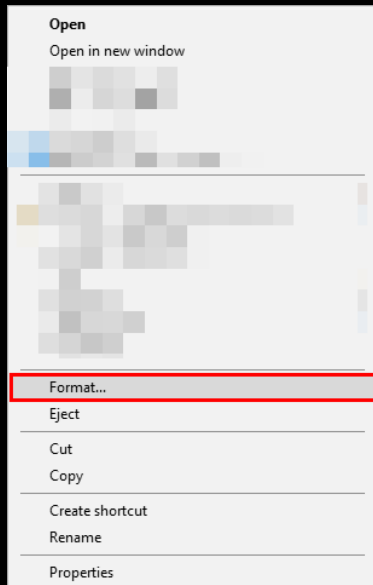

How to update the Razer Leviathan Firmware

Use this guide to update your Razer Leviathan Sound Bar firmware.
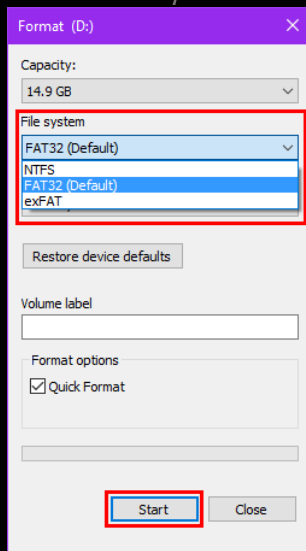

This guide instructs you to create a USB Firmware Updater for your Razer Leviathan Sound Bar and update the firmware using the USB Firmware Updater created.

Step One: Prepare the USB Firmware Updater.

- Connect a blank USB flash drive/stick to your computer.
- Locate the USB drive/stick from Windows File Explorer.
- Right-click the detected USB flash drive/stick and select Format.

- Ensure **File system** is set to FAT32 and click **Start**.

- Click on OK when you see the warning prompt.
- Copy the firmware file (.mdu) into the formatted USB flash drive/stick.
- Safely eject the USB flash drive/stick from your computer.

Step Two: Update your Razer Leviathan Sound Bar Firmware

- Turn off your Razer Leviathan Sound Bar by holding down the Power button.

- Ensure ALL cables are unplugged from the back of your Razer Leviathan Sound Bar.
- Locate and connect the USB Firmware Updater you have just created into the Service USB port at the back of your Razer Leviathan Sound Bar.
- Ensure that the USB flash drive/stick is firmly plugged in.
- Connect the power cable to your Razer Leviathan Sound Bar.
- The update will begin when the power is supplied and your Razer Leviathan Sound Bar detects the USB Firmware Updater.
- Ensure that the Power button light and OPT indicator lights are up. AUX and Bluetooth indicator lights will be lighted up as the firmware upgrade continues. If there is no light on the indicator, ensure power source has been turned on.
- When all the input indicator lights are off (left to the power button) and all equalizer indicator lights are up (right to the power button), disconnect the power cable from your Razer Leviathan Sound Bar.

- Remove the USB Firmware updater from your Razer Leviathan Sound Bar and connect the power cable.
- The firmware is updated and your Razer Leviathan Sound Bar is now ready to use.
